

RUSSIA – THE ORPHANAGES

Here are some of the children at the Peterhoff orphanage. This is the first time that we have “officially” been allowed to go in and do individual evaluations and write developmental programs for the children in this orphanage. They were very excited to have some individual attention and “show off”. For most of these children, since they are label as disabled, this was the first time that anyone has ever done any specific developmental or educational work with them. They loved it and the staff was amazed at what the children could do with just a few minutes of instruction!

“We are seeing the children with new eyes”
was the comment from the head medical doctor at the orphanage.

Below are pictures of the staff training session we were able to conduct at the orphanage.
